01 PROFESSIONAL SUMMARY

Final-year B.Tech CSE (AIML) student at UPES, Dehradun (2023–2027). Builds user-facing products **end to end** — user flows through to working interfaces, dashboards and APIs. Translates business requirements into intuitive, usable web experiences with **React/Next.js**, and collaborates cross-functionally through **Agile practices**, clear documentation and iterative feedback. Daily user of **Gen-AI tools** for ideation, research, content structuring and rapid prototyping. Organized, proactive, comfortable owning problems in fast-paced environments — seeking a UI/UX & Ops internship to grow into full-time design.

02 EXPERIENCE

Project Intern · IBM (Remote)

Jun 2026 — Jul 2026

Personalized Learning Path Generation System — AI-powered, user-centered

- Translated business requirements into a user-centered, AI-powered Personalized Learning Path Generation System, following Agile practices from design through deployment.
- Designed, developed and tested **15+ scalable REST APIs** and user-profiling logic for personalized learner experiences, validated through structured test cases.
- Documented technical specifications and design decisions for cross-functional teams, iterating on recommendation logic through code reviews and feedback.

AI/ML Intern · Safe Pay India

Jun 2025 — Jul 2025

Fraud-detection data & model support

- Analyzed and preprocessed **500+ financial transaction records** to identify patterns, anomalies and control gaps, supporting ML model development for fraud detection.
- Built and tested AI-based solutions, contributing to model validation, data reconciliation and structured reporting of findings.

03 SELECTED PROJECTS

AI Company Simulator — Multi-Agent Virtual Company

`React / Next.js · Python · FastAPI · pgvector · Docker`

Built a real-time React/Next.js dashboard for agent status, task progress and reports, turning complex multi-agent activity into readable views; built the Python/FastAPI multi-agent system with orchestration, tool use and pgvector memory.

AI Email Assistant — AI SaaS Application

`Node.js · Express.js · Prisma ORM · Docker · Redis · BullMQ`

Deployed a full-stack assistant integrating Gmail and Outlook to organize inboxes, generate smart replies, summarize threads and flag priority mail; added Google & Microsoft OAuth, REST APIs (Gmail API, Microsoft Graph) and unit-tested jobs for reminders and a daily digest.

Personalized Learning Path Generator — IBM Project

`React / Next.js · Python · REST APIs · Agile`

Designed the interface, user flows and 15+ supporting APIs for an AI-powered learning path system, with documented specs, test cases and code-review iteration.
